Frontend Assignment Task – Static UI (React)

Create a **static frontend website using React** with **a new UI theme,** based on the existing Ascencia Business School website.

This assignment is **UI-only.** No backend or API work is required.

Pages to Create (3 Pages Only)

Recreate the following pages with a **fresh UI theme:**

- **Home Page**
  https://www.ascencia-business-school.mt/
- **About Us Page**
  https://www.ascencia-business-school.mt/ascencia-malta/
- **Contact Page**
  https://www.ascencia-business-school.mt/contact/

UI Guidelines

- Use **React** (functional components).
- Create a **new theme / design,** but it should **align with the existing logo and brand identity.**
- You may **reuse text content and assets (images, icons)** from the live website.
- Focus on:
  - Clean layout
  - Proper spacing & typography
  - Visual consistency
  - Professional look & feel

Technical Requirements

- **Static UI only** (no API, no backend).
- Use **HTML, CSS, and React.**
- Do **not** use UI frameworks (Bootstrap, Tailwind, MUI, etc.).
- Fully **responsive** (desktop, tablet, mobile).
- Clean and readable code structure.

Submission Instructions

- Deploy the project and share the **live URL.**
- Push the complete source code to **GitHub.**
- Include a minimal README with setup instructions.

Notes

- This assignment is designed to test **UI skills, responsiveness, and React structure.**
- Keep the scope limited to the **three pages only.**
- No additional features are required.
